

Motolux UFO Hub

The Motolux RF Hub allows users to operate any type of RF motorised product that Motolux has to offer. The Hub lets you open or close your blinds with a simple tap on your smartphone or tablet. The Motolux RF Hub also has a built-in IR transmitter which can control 8,000+ different devices for most TV's, air conditioners and other remote-controlled devices around your home (IR within line of sight).

Product Benefits: The UFO Hub gives users the flexibility to operate blinds from anywhere via a WIFI (2.4GHz) or 4G connection. Using the ORVIBO Home app, you can:

- Control all Motolux RF products, including roller (AC and DC), roman and curtain products.
- Set timers for individual or group motors.
- Smart scene setting and one-key control: supports the customisation of multiple automation settings creating a truly smart home.
- Easily put multiple hubs on one app if needed.
- No Limit of devices being controlled.
- Fully customised rooms and screens, including users own photos for each screen.
- User information can easily be transferred from one device to another from the cloud.
- Fully integrated with Google Home and Amazon Alexa (no third-party application needed such as IFTTT).

Installation: The Hub unit is not a programming tool and cannot be used to program motor limits or other functions. Before the Hub can be used, it is important that the motor direction and limits are fully setup using a hand-held remote control first.

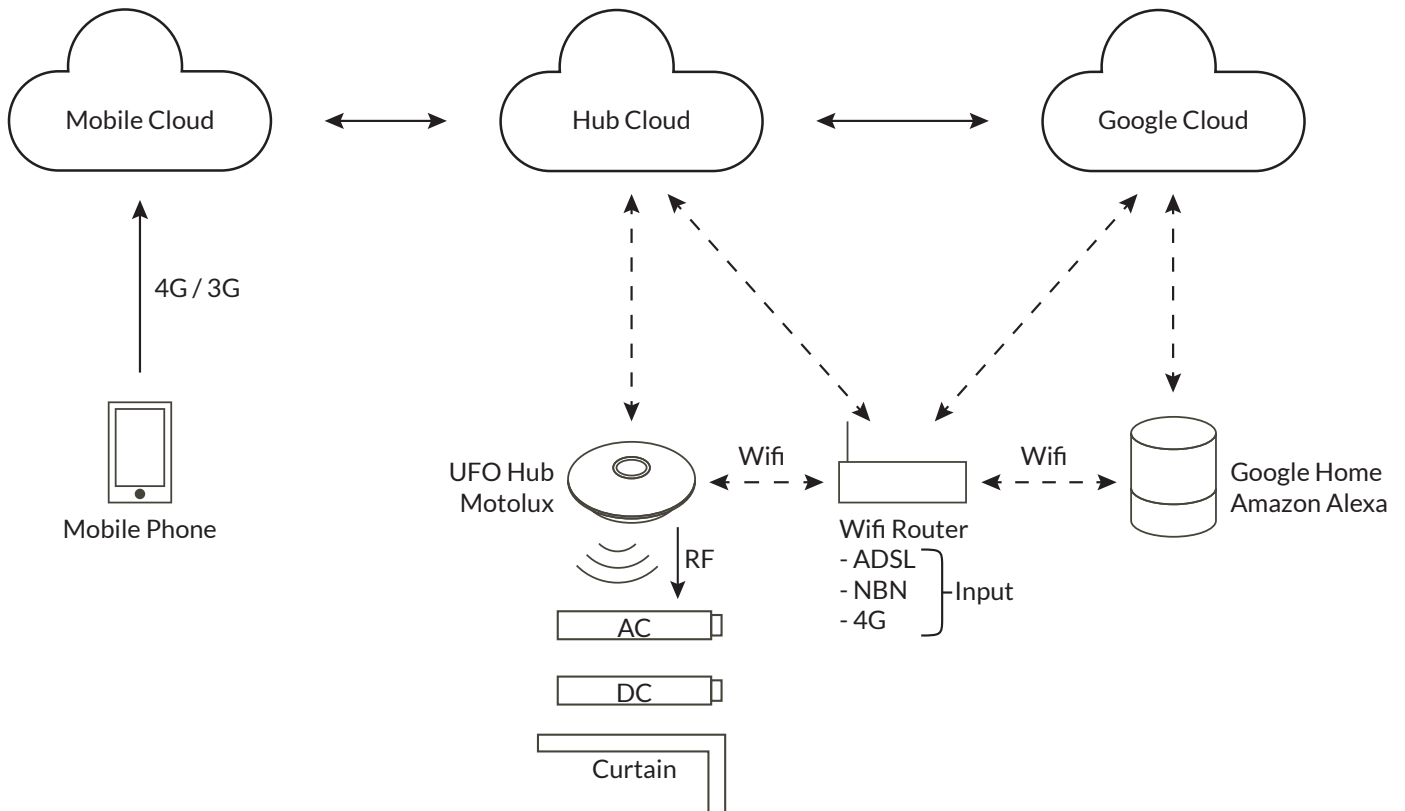

MODEL	801761890
Voltage	5 Volts
Current	1A micro USB input
Power	0.5W
IR Frequency	20-60KHz
Radio Frequency	433.92MHz
Operating Distance	50 metres (indoors)
WIFI Network	2.4GHz 802.11 b/g/n
Dimensions	110mm Diameter x 31mm

Motolux creates world-class motorisation products and systems, dedicated to window covering markets worldwide.
