

## Roman

Motorising Romans has never been easier

2 YEAR  
MANUFACTURER  
WARRANTY

Motolux's motorised Roman blind system is a uniquely designed head rail system, eliminating the need for roller tubes and hybrid systems. With a narrow projection of just 42mm (1 2/3") for any width to 5.5m (18') and large lifting capacity of 12kg (26lb), this system is suitable for all types of Roman blinds in commercial and residential areas. Assembly, installation and programming are all easy to do.

### Product benefits:

- » Standardised profile for all Roman widths
- » Fast and simple installation and programming
- » Integrates on same remote control with Motolux roller blind, curtain and cellular blind motor systems
- » Top finish for fabrics and woven woods
- » Available as pre-fabricated motorised tracks in certain markets
- » Simple motor set up without disconnecting power to other motors
- » Low noise operation
- » Five year manufacturer's warranty - Australian design and patent

### Safety features:

- » Inbuilt safety device to prevent accidental damage while setting the upper limit
- » Overload and over-temperature protection in-built

### Mounting and installation:

- » Maximum blind width 5.5 metres (18') and 3.5 metre (11' 6") drop
- » Suitable for light to heavy weight Roman blinds up to 12kg (26lb) blind weight
- » Narrow projection of 42mm (1") from the wall, does not vary with different Roman widths
- » Suitable for either wall mount (with installation bracket) or top fixing (through holes in the top of the head rail)
- » Fabric attached to the top of the head rail using either double sided tape or Velcro. If required, upholstery pins provide added support for heavy fabrics.
- » No sewing required.

### **Programming:**

- » Fully electronic programming and operation
- » Radio remote control handset or fixed wall switch
- » Automation system compatible as standard, including simultaneous use of remote control
- » Micro-stepping adjustment in 1mm increments ensures precision leveling and alignment at the top and bottom
- » Easy programming with independent setting of channels and limits
- » Remote operation up to 30 metres (100 feet) inside buildings and up to 100 metres (300 feet) in open areas
- » Individual or group motor control, with up to 11 channels per remote and 24 channels per motor
